

Showertime!

ann brundige studio
www.annbrundigestudio.com

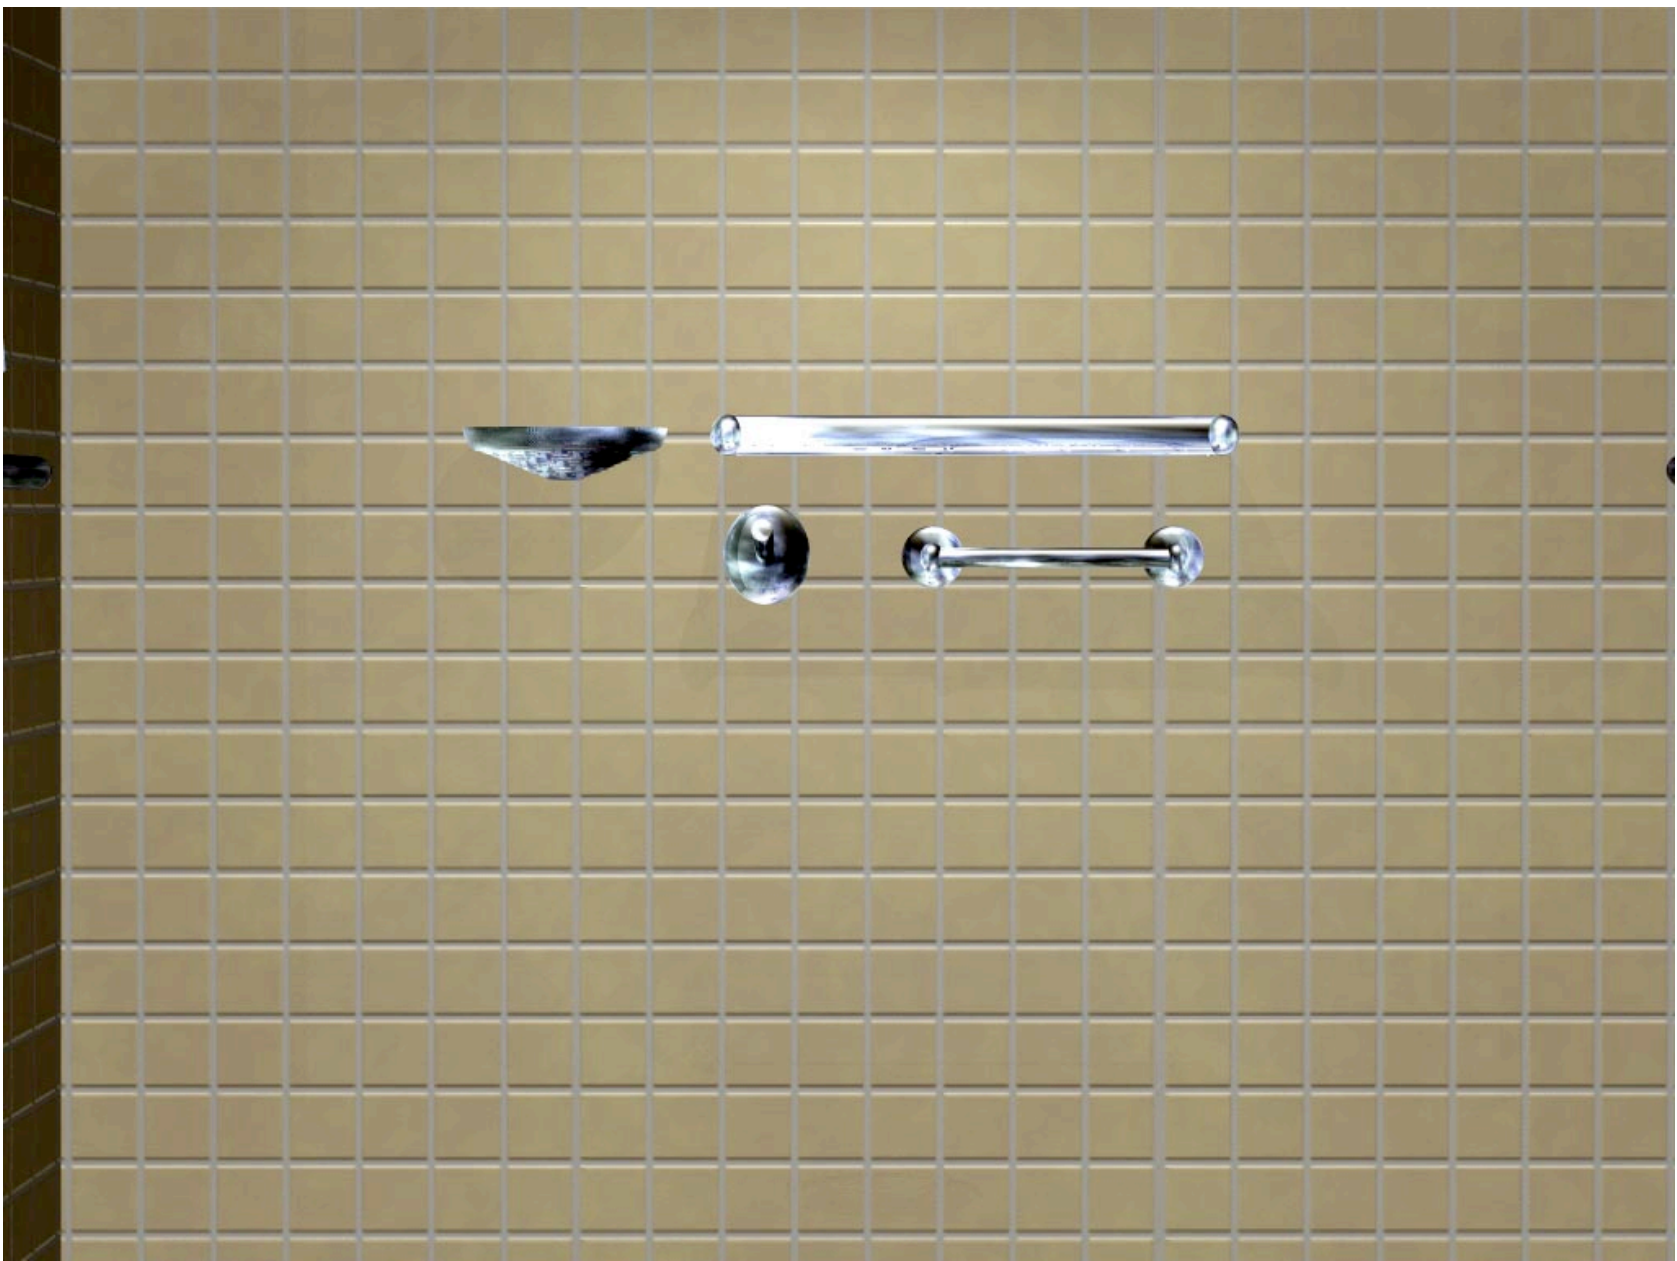

Let's get ready for a shower. First, let's put a towel on the rack beside the door.

There is the towel on the rack. Now let's open the shower curtain.

The curtain is out of the way. Now you can go inside the shower.

Okay. You will need some soap. Put the soap into the soap dish.

Good! You will also need some shampoo.
Put the shampoo onto the shelf.

That's right. Now get a long back brush.
Put it on the peg below the shelf.

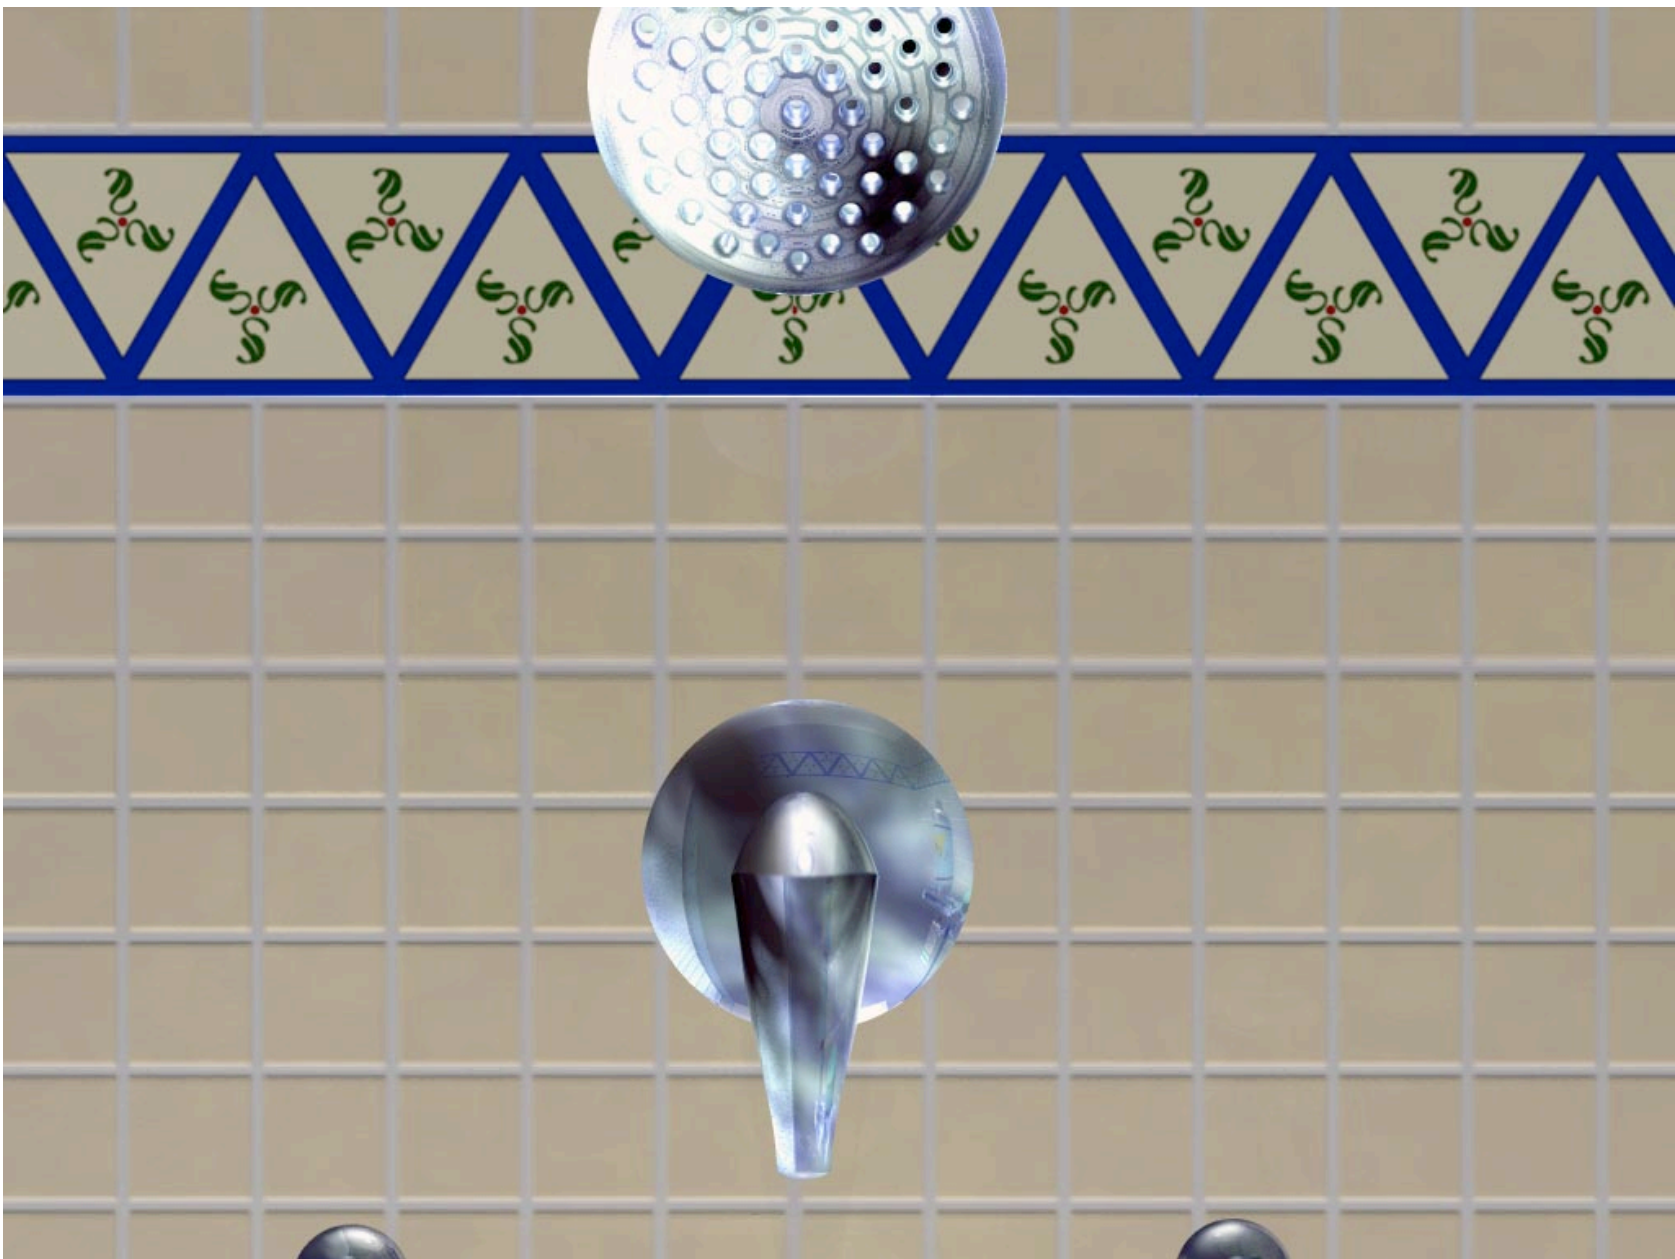

Good job! You will also need a washcloth.
Hang it on the rack beside the brush.

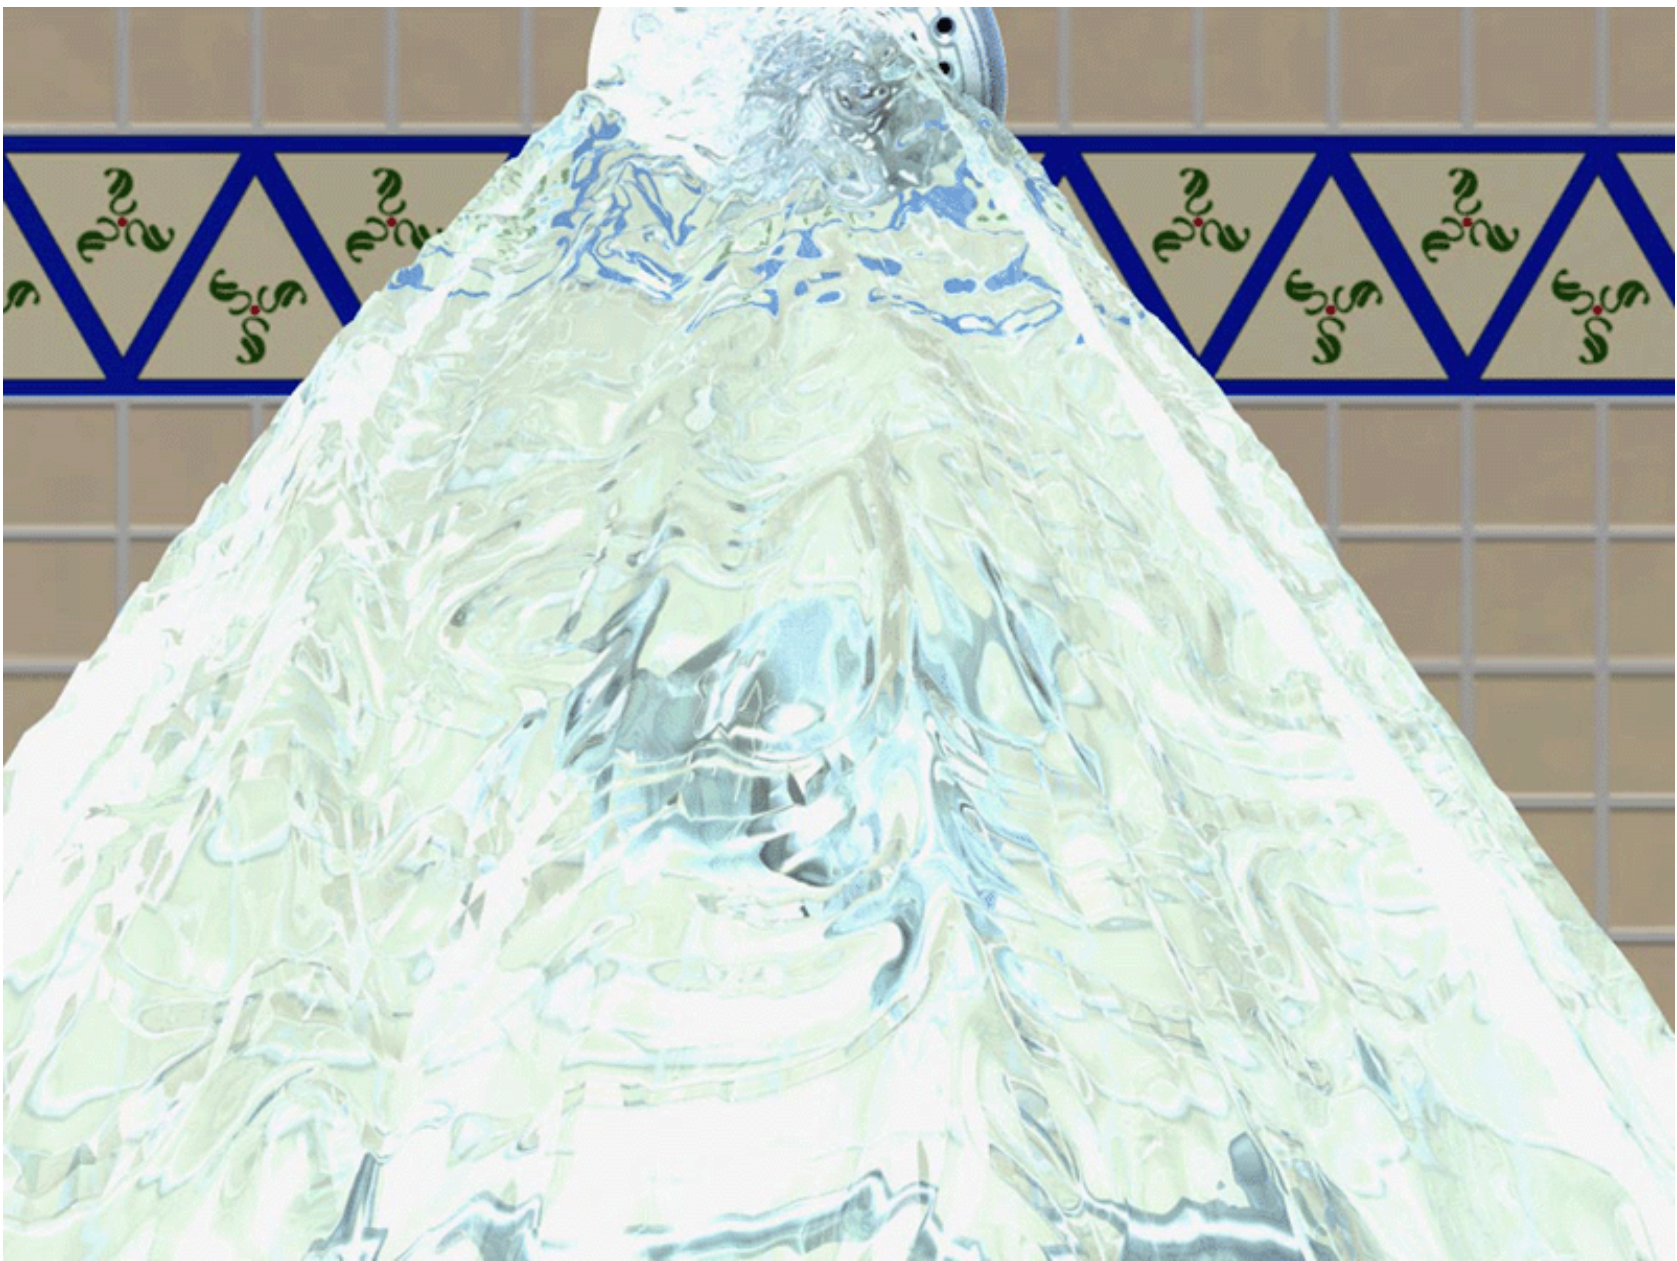

That's everything you need! Now close the shower curtain.

Good, the curtain is closed. Now the floor will not get wet.

It's Showertime! Just turn the handle to start the water.

That warm water feels so good!

THE END
THE END
